

AZ StRUT Hard Drive Security Procedure

Donated (Incoming) hard drive (with or without computer)

Dropped off at 1720 W. Broadway Rd. Mesa, Az (Tuesdays or Thursdays)

Upon request of securing the donated hard drive

- We will perform a complementary drive-wipe (1x) on all SATA hard drives.
- We will perform a complementary drive-wipe (1x) on all PATA hard drives 80GB or larger.
- We will destroy older, smaller hard drive by drilling a hole in the hard drive around the disk area on hard drives smaller than 40gb.

Donated (Incoming) hard drive (with or without computer)

Dropped off at one of StRUT's schools

- Any hard drive security measure is an agreement made individually between the instructor at the StRUT school and the donor.

Donated (Incoming) hard drive (with or without computer)

Dropped off at one of the Batteries Plus locations

- There is no promise or assurance of hard drive security, we will perform same security measures once we receive this equipment at our Mesa location.

Donated (Incoming) hard drive (with or without computer)

Dropped off at one StRUT's events (CRD)

Upon request of securing the donated hard drive

- We will perform a complementary drive-wipe (1x) on all SATA hard drives.
- We will perform a complementary drive-wipe (1x) on all PATA hard drives 80GB or larger.
- We will destroy older, smaller hard drive by drilling a hole in the hard drive around the disk area on hard drives smaller than 40gb.
